

GRADUATE PROGRAM ROTATION APPROVAL FORM

You have the option of rotating in three laboratories during the first year. This can be a valuable aid in choosing your mentor. It allows you and the faculty member the opportunity to evaluate whether or not a working relationship is mutually beneficial. If you wish to rotate in a particular laboratory, you should clearly state your interest in that laboratory and ask the faculty member if they will accept you as a rotation student. Have them indicate their interest by signing this form. Rotations may be 5-8 weeks long.

Please complete and return this form to Manter 402.
